Profile

Motivated B.Tech Computer Science undergraduate (9.18 CGPA) with a strong foundation in full stack development and a growing interest in AI and Machine Learning. Quick to learn and adaptable, with a proactive approach to exploring new technologies and domains.

Technical Skills

Languages & Frameworks: Java, SQL, Javascript, HTML/CSS, Spring boot, React, Vite, Flask, TailwindCSS.

AI & ML: Python, Scikit-learn, Pandas, NumPy.

Developer Tools: Git, Github, VS Code, IntelliJ IDEA, Postman, MySQL, Vercel.

Core Competencies: Full-stack development, Machine Learning Engineering.

Featured Projects

Smart Contact Manager | *Java, Spring boot, TailwindCSS, HTML, Javascript, MySQL* *(github link)*

- Built a full-stack contact management web application in Spring Boot, following **MVC architecture**.
- **Authentication** and **authorization** with **Spring Security** including **OAuth2** login via Google and Github.
- Designed dynamic front-end pages with **Thymeleaf** and TailwindCSS, with support for dark and light mode toggling.
- Enabled users to **add, view, edit and delete** personal contacts, with data securely stored and retrieved using MySQL.

AutoVal - Used Car Resale Price Estimator | *Python, Flask, scikitlearn, Pandas, joblib, HTML, CSS, JS* *(github link)*

- Collaborated in a **6-member team** to develop a ML-based car price prediction web application using **real-world data**.
- Contributed to **data preprocessing** and **feature engineering**, including handling missing values, outliers etc.
- Co-authored project **documentation** and supported end-to-end development.

Vehicular Fog Computing (VFC) - Task Offloading Simulator| *Python, Flask, SUMO, HTML, CSS* *(github link)*

- Collaborated in a **4-member** team to develop a VFC simulator for decision-making in transportation systems.
- Worked with the team to integrate **priority-based task scheduling** and offloading (vehicle, peer, RSU, cloud).
- Developed an interactive Flask-based dashboard for monitoring of metrics, task events, and system performance.

Swan Botanicals - A Skin Care Brand Website | *HTML, CSS, JavaScript, React, TailwindCSS* *(live link)*

- Developed a **responsive** web application for Swan Botanicals as part of the Build for Botanicals competition.
- Built features including **product showcase, carousels, and interactive navigation** for better user engagement.
- Collaborated on UI/UX design decisions, ensuring alignment with Swan Botanicals' brand identity.

Education

Kalinga Institute of Industrial Technology (KIIT) Bhubaneshwar, Odisha
Bachelor of Technology in Computer Science and Engineering *Jul. 2023 – Jul. 2027,* ***CGPA - 9.18/10.00***

St. Joseph's College Prayagraj, Uttar Pradesh
ISC (Class XII): 87.75% | ICSE (Class X): 93% *Apr. 2021 | Apr. 2023*

Acheivments & Certifications

- 150+ questions solved on **Leetcode** demonstrating strong DSA fundamentals**.** (profile)
- Certified in Java on **Hackerrank** demonstrating strong fundamentals in programming. (link)
- Got an **SGPA of 9.54** in 4th semester, demonstrating strong knowledge of core CS subjects.

Languages

- **English** (Fluent), **Hindi** (Fluent)
